Web Engineering Lab Assignment

Project Report Documentation

Personal Portfolio Website

Student: Muhammad Ali Ghias
Institution: City University of Science and Information Technology (CUSIT), Peshawar
Program: Bachelor of Software Engineering
Course: Web Engineering Lab
Academic Year: 2026

GitHub Repository: ali-ghiax/Web-Engineering-Lab-Assignment
GitHub Profile: github.com/ali-ghiax

---

1. Introduction

This report documents the design and development of a multi-page personal portfolio website completed as a **Web Engineering Lab Assignment**. The website presents the academic profile, professional skills, services, and software projects of **Muhammad Ali Ghias**, Junior Software Engineer, Graphic Designer, and Lead Microsoft Learn Student Ambassador at CUSIT.

The project applies core web engineering practices: structured HTML markup, cascading stylesheets, responsive layout, reusable Bootstrap components, and client-side JavaScript enhancements.

---

2. Project Objectives

Objective	Description
Personal branding	Present a clear professional identity online
Multi-page structure	Organize content across Home, Resume, Services, Portfolio, and Contact
Responsive design	Ensure usable layout on desktop and mobile
Project showcase	Display selected GitHub software projects
Template customization	Adapt a Bootstrap portfolio template with personal content and styling
Version control	Host source code on GitHub for submission and review

---

3. Project Overview

Item	Detail
Project title	Web Engineering Lab Assignment — Personal Portfolio
Project type	Static multi-page website
Primary language	HTML5, CSS3, JavaScript
UI framework	Bootstrap 5.3.7
Template base	FolioOne (BootstrapMade)
Repository	https://github.com/ali-ghiax/Web-Engineering-Lab-Assignment

Local project folder	`FolioOne`

3.1 Pages included

1. **Home (`index.html`)** — Hero introduction, About, Skills, Stats, Testimonials, Footer
2. **Resume (`resume.html`)** — Education, skills progress, professional experience
3. **Services (`services.html`)** — Web, design, workshops, and event-related services
4. **Portfolio (`portfolio.html`)** — Filtered grid of GitHub projects
5. **Portfolio Details (`portfolio-details.html`)** — Detail layout retained from template
6. **Contact (`contact.html`)** — Location, phone, email, and contact form

---

4. Template Reference (Mandatory Attribution)

This assignment is built on a third-party Bootstrap portfolio template. All template credit is stated below for academic transparency and license compliance.

Field	Value
Template name	**FolioOne**
Template type	Bootstrap portfolio website template
Author / vendor	**BootstrapMade.com**
Official template URL	https://bootstrapmade.com/folioone-bootstrap-portfolio-website-template/
License information	https://bootstrapmade.com/license/
Framework	Bootstrap 5

4.1 What was customized

The FolioOne structure (header, sections, Bootstrap grid, vendor scripts) was kept. The following were personalized:

- Student name, roles, bio, education, and experience
- Contact details (Peshawar, phone, student ambassador email)
- Social links (GitHub, LinkedIn, Instagram)
- Portfolio content replaced with GitHub projects
- Footer redesigned (professional layout, no Odoo / BootstrapMade credit line as requested during customization)
- Profile photography (hero circular cutout; About cutout with accent neon underline)
- Navigation simplified (Home, Resume, Services, Portfolio, Contact)

> ***Note:*** *FolioOne remains the visual and structural foundation. This report acknowledges BootstrapMade as the template author.*

---

5. Student Profile (Content Used in the Website)

Field	Information
Full name	Muhammad Ali Ghias
Roles	Junior Software Engineer; Graphic Designer; Lead Microsoft Learn Student Ambassador (MLSA) at CUSIT
Location	Peshawar, KPK, Pakistan
Phone	+92 326 5763041
Email	MuhammadAli.Ghias@studentambassadors.com

LinkedIn	https://www.linkedin.com/in/muhammad-ali-ghias/
GitHub	https://github.com/ali-ghiax
Instagram	https://www.instagram.com/ali_ghiax/
Education	Matriculation & Intermediate — The Mardan Model School and College, Mardan; BS Software Engineering (2024–Present) — CUSIT

---

6. System Architecture

```
FolioOne/
├── index.html, resume.html, services.html, portfolio.html,
│   portfolio-details.html, contact.html
├── assets/
│   ├── css/main.css          ← primary custom styles
│   ├── js/main.js            ← template behaviors
│   ├── img/                  ← images & profile photos
│   └── vendor/               ← Bootstrap, AOS, Swiper, etc.
├── README.md
├── docs/                     ← this report
└── .gitignore
```

6.1 Technology stack

Layer	Technology
Markup	HTML5
Styling	CSS3, custom properties (theme colors), Bootstrap 5
Scripting	Vanilla JavaScript (`assets/js/main.js`)
Animation / UI helpers	AOS, Typed.js, Swiper, Isotope, GLightbox, PureCounter, Waypoints
Icons	Bootstrap Icons
Fonts	Google Fonts (template stack)
Hosting / VCS	Git + GitHub

6.2 Design theme

- Dark portfolio theme (`#101a20` background family)
- Accent color: `#1387c1`
- Responsive Bootstrap grid and mobile navigation

---

7. Functional Description by Module

7.1 Home

- Typed rotating titles (Junior Software Engineer, Graphic Designer, Web Developer, Microsoft Learn Student Ambassador)
- Circular hero portrait with accent ring
- About section with background-removed portrait and neon accent line
- Skills cards, timeline, stats counters, testimonials carousel

7.2 Resume

- Education and experience rewritten to real academic/work background
- Skill bars for Graphic Design, HTML & CSS, Adobe Photoshop, C++

7.3 Services

Six service cards: Web Pages, Social Media Design, Graphic Design, Brand Visuals, Microsoft Learn Workshops, Event Design (without "Learn More" links).

7.4 Portfolio

- Filter categories: **All / Web / Apps / Code**
- Cards sourced from public GitHub repositories under `ali-ghiax`
- Open Graph preview images and links to repositories / live demos where available
- CTA: "View All on GitHub"

7.5 Contact

- Location, phone, email, and message form layout
- Professional site footer shared across pages

---

8. GitHub Code Details

8.1 Repository information

Field	Value
Owner	**ali-ghiax**
Repository name	**Web-Engineering-Lab-Assignment**
Visibility	Public (as created by student)
Clone URL (HTTPS)	`https://github.com/ali-ghiax/Web-Engineering-Lab-Assignment.git`
Web URL	https://github.com/ali-ghiax/Web-Engineering-Lab-Assignment
Default branch	`main`

8.2 How to clone and run

```
git clone https://github.com/ali-ghiax/Web-Engineering-Lab-Assignment.git
cd Web-Engineering-Lab-Assignment
# Option A: open index.html in a browser
# Option B: local static server
npx serve .
```

8.3 Version control highlights

- Source managed with Git
- Remote: `origin` → GitHub repository above
- Initial commit message documents the portfolio assignment delivery
- `.gitignore` excludes temporary folders, `node_modules`, and environment files

8.4 Related GitHub project showcase (on Portfolio page)

Selected repositories displayed on the site include (non-exhaustive):

- Thermal-Receipt-Generator
- muhammad-ali-ghias-portfolio

- nexora-scientific-calculator
- Clothing-Website
- mlsa-cusit-official-website
- Memory-Match-Game / Tic-Tac-Toe-Game
- Eagle-Traders-Desktop-ERP
- Face_Mask_Detector
- Book-Management-App / Library-Management-App
- daily-task-tracker
- SRE-Major-Project
- Cpp_Basics_First_Semester / OOP_In_Cpp_2nd_semester

Full list: https://github.com/ali-ghiax?tab=repositories

---

9. Implementation Summary

Activity	Outcome
Template selection	FolioOne by BootstrapMade adopted as base
Content replacement	Placeholder Brandon Johnson / FolioOne text replaced with real CV data
Navigation cleanup	About & Dropdown removed from menu; About section kept on Home
Social integration	GitHub, LinkedIn, Instagram wired to real profiles
Portfolio rebuild	Creative placeholder items removed; GitHub projects only
Visual identity	Custom footer, profile images, neon accent under About photo
Documentation	README + this formal lab report
Code hosting	Pushed to GitHub assignment repository

---

10. Tools & Environment

- Code editor: Cursor / VS Code-compatible tooling
- Browser for preview and verification
- Git for source control
- GitHub for remote hosting and assignment submission
- Optional local preview via `npx serve`

---

11. Limitations & Future Work

- Contact form uses the template PHP endpoint; full backend email delivery requires server-side configuration.
- Portfolio cards rely on GitHub Open Graph images (internet required for previews).
- Future improvements: deploy to GitHub Pages / Vercel, add more project case studies, and wire a working contact API.

---

12. Conclusion

The Web Engineering Lab Assignment successfully delivers a professional, responsive multi-page portfolio website. Starting from the **FolioOne** Bootstrap template by **BootstrapMade**, the site was customized with authentic student data, GitHub project listings, and polished UI details. The complete source code is available at:

https://github.com/ali-ghiax/Web-Engineering-Lab-Assignment

This fulfills the lab goals of applying HTML/CSS/Bootstrap structure, organizing content into clear pages, and publishing work through GitHub.

Appendix A — Declaration

I, **Muhammad Ali Ghias**, declare that this Web Engineering Lab Assignment portfolio website was developed/customized by me for academic submission. The FolioOne template by BootstrapMade is acknowledged as the base design. GitHub projects shown are from my public repositories under **ali-ghiax**.
